MEMORANDUM FOR: Deputy Director (Support)

SUBJECT: Air Conditioning Requirements - Office of Personnel

1. This memorandum contains a recommendation submitted for DD/S approval in conjunction with air conditioning for the Office of Personnel for Curie Hall. Such recommendation is contained in paragraph h.

2. To provide space for [] in Curie Hall adjacent to areas already occupied, the Interim Assignment Branch, Office of Personnel, was moved to Quarters Eyc and other components of the Office of Personnel were relocated within Curie Hall. The space vacated by Personnel and now used by [] is air conditioned, while the space vacated by the Interim Assignment Branch was not air conditioned. As a result of this move, components of the Office of Personnel who have had air conditioning in the past will be without it while [] will have air conditioning.

3. The air conditioning in question, as it would be in the space used by the Office of Personnel, falls into the "comfort cooling" category. According to provisions of Public Law 763, 77th Congress and a modification contained in Public Law 410, 81st Congress, all Federal agencies are prohibited from purchasing air conditioning and ventilating equipment, except for special laboratory, scientific and research purposes. However, if the units left in the space vacated by the Office of Personnel were moved to their new space, the air conditioning in question would be for [] rather than for Personnel. In this connection, it is pertinent to point out that on 21 July 1955, the DCI approved the expenditure of unvouchered funds for the purpose of air conditioning required at that time for [].

4. Air conditioning for [] in its new location can be substantiated under the same criteria for which the DCI approved it in July. It is recommended, therefore, that approval be given to purchase the required number of window type units out of unvouchered funds for this purpose.
